

NEW HINO TRUCKS In 2009

The spring of 2009 brought NEW Hino Trucks into the Bucky Food Service Fleet!! This new fleet of refrigeration delivery vehicles produces lower emission levels while reducing fuel and maintenance costs.

This new technology produced by Azure Dynamics of Toronto is called LEEP Freeze System-Low Emission Electric Power. The Azure LEEP Freeze System is matched with a Kidron Ultra Temp system to provide a transport refrigeration solution.

Overnight, the Ultra Temp system can be plugged into either single or three phase power sources, eliminating cost, fuel, noise, and emissions from diesel engines and generators for off duty charging.

Bucky's is always looking for better more efficient ways to effectively service our customer base while utilizing environmentally friendly technologies.
